

## SCIENTIFIC SUMMER CAMP SMITHY OF IDEAS 2010

June 17-20, 2010, homestead Trakšalis, Katyšių village, Trakai district

### PRACTICAL INFORMATION

#### How to get there?

From the city Trakai take the road towards Aukštadvaris (road A16/E28) and go for 14 km from Trakai until you see the bollard with the mark of „37“ kilometres. From there start to look ATTENTIVELY for the turn to the right. The turn will be marked with the sign on the tree saying „Idėjų kalvė“. Take the forest road and go for 3 km until you reach the homestead „Trakšalis“.

#### Accommodation

The rooms in the houses of the homestead are big and up to 20 persons can sleep in one room. We recommend you to take sleeping bags, because some are double beds with only one cover. If you don't want to sleep in the room, you can bring the tent and build it in the territory of the homestead.

#### Leisure

Every evening will be a time for leisure and amusement. We hope that you will demonstrate your talents! We invite all of you who are singing, playing music or dancing to bring some ideas of how you can enrich the evening programme. You can bring the words of the songs, music or karaoke records. Please take with you table games, your guitar or other „mobile“ instrument, balls or other sports inventory – everything that would help to have a good time.

Preliminary evening programme:

- » Friday evening – paintball or some similar game (that would cost around 30 Lt per person) and barbeque time;
- » Saturday evening – sauna and barbeque time.

#### Meal

The organisers are glad to receive some many applications of the participants. However, we have the funding to cover the costs of the meal only during breakfast, lunch and supper for Friday, Saturday and Sunday (June 18, 19 and 20).

Therefore we ASK you:

- » To bring some food for barbeque (sausages, vegetables, drinks for yourself and your friend) for two evenings;
- » Those arriving on Thursday (June 17) to bring some food as the meals will not be served during Thursday.

### Information for presenters

Please prepare your presentation and take with you as a PPT file (PowerPoint programme). The duration of the presentation should be 15 min: 7 min will be dedicated for the presentation and 8 min – for discussions.

The structure of the presentation:

- » 1) The aim of your work, the problem you are investigating; 2) Very shortly about your results and the discussion of results; 3) The main questions for the discussion.
- » **IMPORTANT:** In the last part of the presentation, dedicated to the questions for discussion, you should state what are your scientific expectations from the „Smithy of Ideas“, what problems are you facing in your work and what kind of help and collaboration are you expecting from the colleagues.

We recommend you:

- » To give your presentation using simple language that would be understandable to the researchers from various fields (do not forget that there will be participants not only from your specific scientific area);
- » To give you presentation in English or at least to do a short summary of your presentation in English during your presentation;
- » To share the problems you face in your research at the end of your presentation. Maybe there will be other participants that will be able to help you to solve some of them or maybe you will help others to avoid some of your mistakes.

Please inform us in advance, if you will notice that the title of your presentation is incorrect.
